

Amos Golan received his Ph.D. degree from UC Berkeley. He is a professor of economics and directs the Info-Metrics Institute at American University. He is also an External Professor at the Santa Fe Institute and a Senior Associate at Pembroke College, Oxford. His research is primarily in the interdisciplinary field of info-metrics – the science and practice of information processing, modeling, inference, and problem solving with insufficient information. His most recent book (2017) is *Foundations of Info-Metrics: Modeling, Inference and Imperfect Information*. His other books include *Maximum Entropy Econometrics: Robust Estimation with Limited Data* (coauthored with Judge and Miller), *Information and Entropy Econometrics – A Review and Synthesis*, and *Estimating Market Power and Strategies* (with Perloff and Karp). Professor Golan's work has been published in economics, econometrics, statistics, mathematics, physics, visualization and philosophy journals. Examples include the Journal of the American Statistical Association, Journal of Econometrics, Review of Economics and Statistics, Econometric Reviews, Journal of Physics A: Mathematical and General, Physica A, IEEE, and Minds and Machines.
